

What's *Really Medical About Marijuana?*

Doctor prescribed medication is dispensed by a pharmacist and FDA approved. This type of medication includes proper dosage and possible side effect warnings.

Because marijuana lacks FDA approval, it cannot be prescribed by a doctor or dispensed by pharmacies, and its dosing is impossible to regulate. Marijuana is frequently sold at pot shops by people with no medical training.

In some states such as **California** and **Colorado** there are more pot shops than Starbucks coffee shops.
